

SMS with Short URL

Short URL is a simple and powerful tool that enhances connectivity. A long domain is shortened and embedded in the text message to send to the customer database.

- SMSes are sent through Transactional & Promotional route
- Short URL integration in SMS with no cost
- Unique & Customized templates creation as needed

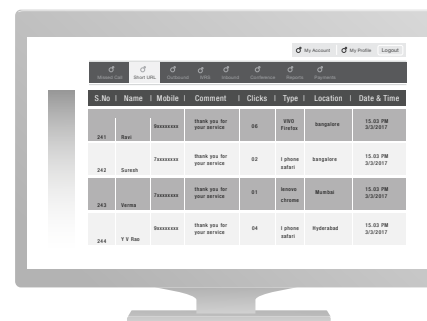

How Short URL Works

- Latest Updates like results, events... etc
- Student performance updates to parents
- Reports & Analytics to know the effectiveness of Campaign
- Acquiring feedback of parents

Feed back

Database

Features
